

Manual Fluid Dispenser System

9337

This 9 litres transfer pump is suitable for filling of nearly all liquids. Suitable for all oils, antifreeze, water etc. Thanks to the chemical resistance, the non-corrosiveness and the temperature resistance of the HDPE construction this pump is also suitable for use in the industrial sector. An automatic overfill protection with an overpressure valve ensures additional application security. Includes 3 different adapter hoses with 4, 6 and 10 mm diameter. Heat-resistant up to 60 °C. Weight: 3,0 kg.
