

MANNOL Car Wash Shampoo
4903

Universal shampoo concentrate with the highest washing and cleaning effect for use in foam generators (high-pressure devices) for non-contact washing and for manual contact car washing.

Product properties:
- Forms very rich active foam;
- Effectively removes all types of stains and dirt: dust, fuel, oil, fat, soot, insect residues, etc. due to its excellent splitting properties;
- Suitable for washing glass;
- Easily washed off with water without leaving streaks and smudges and whitish spots;
- Leaves a great glossy effect;
- Can be diluted with warm and cold water. Effective even when using hard water;
- Has a citrus smell;
- Does not contain phosphates;
- Biodegradable, environmentally friendly product that meets all EU requirements.

Compatibility: Safe for paint surfaces, plastics and rubber-technical products.

Application:
For non-contact washing: to prepare the working solution, dilute the concentrate with water in a ratio from (1: 20 to 1: 50), depending on the degree of contamination.
For manual washing: First remove large dirt with a strong stream of water. To prepare the working solution, the concentrate must be diluted with water in a ratio from 1: 10 to 1: 20) depending on the degree of contamination. Apply the mixture with a sponge on the surface to be cleaned and distribute it over it. Then rinse thoroughly with water and wipe with suede.
