

MANNOL LDS Fluid

8302

Synthetic red fluid based on carefully selected base oils of the highest quality. Designed for Citroën passenger cars equipped with HYDRActive 3 hydraulic systems, as well as electrohydraulic power steering systems (EHPS) installed on PSA Citroën, Peugeot, Renault and other vehicles where PSA Standard B71 2710 is required.

Product properties:
- Can be used all year round, even in frigid environments due to very low pour point (-50 °C and below);
- Maintains stable viscosity and fluidity even at low temperatures due to a stable viscosity index;
- Compatible with all types of sealants;
- Preserves optimal viscosity at high loads thanks to excellent shear stability;
- Very high thermal stability and lubricating properties;
- Actively protects against corrosion and wear;
- Prolongs fluid replacement interval up to 5 years or 200,000 km.

Intended for centralized (combined) brake and hydraulic systems of passenger cars and commercial vehicles where a synthetic fluid is required. Not compatible with LHM Plus green fluids!
