

MANNOL Air Brake Antifreeze
9894

Antifreeze for pneumatic brake systems based on aliphatic alcohols and anti-corrosion additives.

Product properties:
- Prevents the formation of ice crystals in brake hoses, receivers and other nodes of the pneumatic brake system;
- Contains special components that consistently protect against rust and corrosion;
- Actively lubricates valves and brake valves and ensures their cleanliness;
- Prevents hardening of rubber seals;
- Reliably binds condensate and moisture, guarantees reliable brake performance, ensuring safe operation in any climate.

Designed for pneumatic brake systems with a tank for the dehumidifier, all types of cars, heavy-duty vehicles, off-road (construction, mining, agricultural) and special equipment.
Follow the brake manufacturer's recommendations in the instruction manual!
