

Special 7509

Affordable universal engine oil with HC basis for gasoline and diesel engines with increased cylinder compression, with and without a turbocharger.

Product properties:

- HC base with an extended range of viscosity-temperature properties ensures engine operation in all operating modes: during cold start, at increased load (off-road and uphill driving, towing, driving with maximum load), and at high ambient temperatures;
- Has reduced ash content and increased thermal-oxidative stability, which, compared with analogues, effectively decrease soot and varnish deposits, and keep engine parts clean throughout the entire interval between replacements;
- Preserves engine power parameters throughout the entire service life and protects the engine from ageing;
- A modern additive package ensures good anti-wear and anti-friction properties, which, combined with good pumpability, significantly increase engine life;
- Effectively protects engine parts from all types of corrosion;
- Can be used with fuels with high sulfur content.

Designed for gasoline and diesel engines of cars, light SUVs, vans and light trucks from European and other manufacturers.

Recommended for engines of Daimler and VW vehicles.
