

MANNOL Energy Formula PSA 5W-30

7703

Innovative, universal, energy-saving, ester-containing, fully synthetic premium engine oil, specially designed for petrol and diesel engines in PEUGEOT and CITROËN vehicles, with a focus both on heavy-duty requirements and extended engine oil change intervals.

Product properties:
- Ester components offer excellent anti-wear and anti-friction properties due to the exceptional durability of the oil film, which, combined with excellent pumpability, significantly increases engine life;
- Actively saves fuel due to low HTHS viscosity;
- Ensures easy and smooth cold start due to excellent crankability and pumpability, which significantly reduces engine wear;
- Maintains optimal viscosity in a wide temperature range, which ensures stable engine operation in all operating modes, including overloads;
- Excellent washing and dispersing ability effectively resists all types of deposits and keeps engine parts exceptionally clean throughout the entire interval between replacements;
- High thermal-oxidative stability effectively resists ageing, increasing the oil change interval;
- Compatible with all exhaust gas aftertreatment systems including DPF, TWC, EGR and SCR thanks to the low SAPS technology;
- Suits engines running on liquefied natural (LNG) and petroleum (LPG) gas.

Designed for petrol and diesel engines of passenger cars and light trucks produced in Europe and other countries meeting EURO III, IV, V standards, equipped with catalysts (TWC) and particulate filters (DFP/FAP), where SAE 5W-30 oil meeting ACEA C3 and C2 standards and conforming to PSA B71 2297 specification is recommended.
