

MANNOL O.E.M. for Renault Nissan 7705

Premium ester-containing engine oil specially designed for gasoline and diesel engines without DPF and RENAULT-NISSAN car engines with direct injection systems, with or without a turbocharger.

Product properties:

- Ester technology and a semi-synthetic base with optimal viscosity ensure efficient engine operation in all operating modes: during cold start, in urban and highway modes, under increased load (off-road and uphill driving, towing, driving with maximum load), and at high ambient temperatures;
- Great for active driving. Does not lose its properties when using fuel of variable quality (with a sulfur content of up to 500 ppm) due to a high total base number (TBN);
- A synthetic ester-containing base combined with a modern additive package preserves engine power throughout the entire interval between oil changes;
- Ester components provide excellent anti-wear and anti-friction properties due to the exceptional durability of the oil film, which, combined with excellent pumpability, significantly increases engine life even in engines with start-stop systems;
- Excellent washing and dispersing properties and the highest thermal-oxidative stability effectively resist all types of deposits and keep engine parts clean throughout the entire service life.

Designed for gasoline and diesel engines of RENAULT, NISSAN, and MITSUBISHI cars and light trucks that meet EURO III, IV, V standards, where SAE 5W-40 oil is advised.
