

MANNOL Textile Foam 9931

Textile Foam is a highly effective foam cleaner for textiles. Removes various dirt from textile elements of the car interior (seats, doors, etc.), furniture upholstery, carpets, fabrics, etc.)

Properties:

- Returns the natural color, restores the original appearance of fabrics and carpet materials, raises the pile, eliminates unpleasant odors and refreshes the air in the car;
- Prevents repeated contamination due to its antistatic properties.

Application:

Shake the balloon thoroughly. We recommend that you treat the entire seat or product completely, not just individual spots. Spray the foam on the soiled textile surface and rub it in with the supplied sponge. After application, rinse the sponge several times and thoroughly wipe the treated surface with it or a clean, damp cloth. Repeat the procedure if necessary.
