

MANNOL Leather Cleaner
9944

Leather Cleaner is a special product with a pleasant smell for effective cleaning and care of leather interiors of cars and their individual elements – seats, steering covers, etc., motorcycle seats, leather furniture and other smooth leather products.

Properties:
- Effectively removes most of the dirt, while strengthening the skin structure due to deep-penetrating active substances;
- Restores elasticity, prevents deformation, cracking and drying of leather surfaces;
- Forms a waterproof layer, which, at the same time, does not make the surface slippery and sticky;
- Does not contain dyes and is suitable for leather products of any color;
- Ideal for vehicles with heated seats with porous leather surfaces;
- The composition includes a UV filter that protects the skin from fading in the sun.

Application:
Shake the can thoroughly before use. Spray on the surface to be treated, then use a clean cloth or sponge to thoroughly wipe the surface in a circular motion, without exerting much effort, spreading the product evenly over it. If desired, after a while, the surface can be polished with 9814 MANNOL Micro Fiber Polish or a clean cloth. Regular use provides optimal care and excellent appearance. Before use, check the product for compatibility with the material on a small invisible area of the surface.
