

MANNOL Defroster
9908

Defroster is a highly efficient defroster for exterior elements of cars and other vehicles. Quickly and efficiently removes snow and ice from windshields, headlights, wiper blades, washer nozzles, rear and side Windows. Suitable for defrosting locks, car doors, trunk lids, etc.

Properties:
- Effectively removes dirt, road de-icing agents, oil stains, silicone film and other heavy dirt from Windows and headlights;
- Gives the treated surfaces anti-icing properties;
- Quickly and easily ensures transparency of the windscreen, providing the driver with clear visibility and improving driving safety. Suitable for all types of windshields: triplex, securiflex, etc. with or without heating, as well as for rear and side windows (tempered glass) and headlights made of any material;
- Does not leave stains and streaks on the glass;
- Chemically neutral to rubbers, plastics and paint coatings.

Application: interior heating is not required to thaw the windows. Remove loose snow from the vehicle elements to be cleaned. Spray on icy surfaces and let it soak in. Mechanical cleaning tools (scrapers and brushes) can not be used - the ice dissolves quickly.
