

MANNOL Motor Kaltreiniger
9671

Motor Kaltreiniger – highly effective detergent for cleaning and maintenance of the engine compartment of the car. Quickly, efficiently and carefully removes any contamination of the engine compartment: oil, residues of evaporated and burnt technical fluids, road dirt and dust, road reagents, etc. Softens and dissolves the most difficult to remove and old dirt. A clean engine is less likely to overheat.
- Has an increased solvent capacity and active cleaning properties;
- Active foam stays on vertical surfaces for a long time, providing excellent cleaning of complex dirt in all dimensions;
- Neutral in relation to plastic, rubber, paint coatings, chrome, nickel, zinc, etc., as well as to the surfaces of ferrous and non-ferrous (aluminum, bronze, brass, etc.) metals and alloys;
- Further prevents oxidation, cracking and loss of properties of rubber and plastic parts of the engine under the aggressive influence of pollution and the environment, prevents oxidation of electrical connections, reduces the risk of short circuits, prevents fire of electrical wiring;
- Can be used for cleaning various aggregates of cars, motorcycles, trucks, tractors and other agricultural and construction equipment, as well as water equipment: chassis, filters, pumps, tools, auto and motorcycle drive chains of all types, garden equipment and tools;
- It is recommended to use at the end of the "dirty" season, before and after engine, suspension or transmission repairs, as well as during pre-sale preparation of the car;
- Can be used for cleaning concrete floors from oil.

Application: Spray on the parts to be cleaned from a distance of 20-30 cm and leave to act for 10-20 minutes, depending on the degree of contamination. Then rinse thoroughly with a strong stream of water.
