

MANNOL Cockpit Care Apple

6145

Cockpit Care Apple – preservative-protector of plastic with a pleasant smell, which serves as its cleaner and at the same time a protective varnish. Compatible with all plastics used in cars.

Properties:
- Protects surfaces from cracking, drying and fading;
- Gives the treated surface its initial shine and has an antistatic effect that prevents the accumulation of dust;
- Recommended for external and internal processing of plastic parts, as well as rubber and vinyl surfaces.

Application:
Clean the surface to be treated before use. Shake the can well before use. Do not spray directly on plastic surfaces. Instead, apply to a dry sponge or cloth and wipe the surface thoroughly. Avoid applying to glass or fabric surfaces. Do not use on the steering wheel, pedals, or door handles.
