

MANNOL Cockpit Care Vanilla

6149

Cockpit Care Vanilla - preservative-protector of plastic with a pleasant smell of vanilla, which serves as its cleaner and at the same time a protective varnish. Compatible with all plastics used in cars.

Properties:
- Protects surfaces from cracking, drying and fading;
- Gives the treated surface an initial shine and has an antistatic effect that prevents the accumulation of dust;
- Recommended for external and internal treatment of plastic parts, as well as rubber and vinyl surfaces.

Application:
Clean the surface to be treated before use. Shake the balloon well before use. Do not spray directly on plastic surfaces. Instead, apply to a dry sponge or cloth and wipe the surface thoroughly. Avoid applying to glass or fabric surfaces. Do not use on the steering wheel, pedals, or door handles.
