

MANNOL Motor Starter
9669

Motor Starter – a special aerosol product designed to facilitate the start of diesel (including with pump injectors and common rail system) and gasoline (injection and carburetor) both two-and four - stroke engines of passenger cars, trucks, construction and agricultural machinery, motorcycles, mopeds, ATVs, snowmobiles, chainsaws, gas tools, garden equipment, as well as marine and boat engines of all types, compressor engines, etc. generators. Provides fast and reliable start-up in winter, even in extreme cold, high humidity, wet spark plugs, irregular fuel supply and a dead battery. It is a combination of highly flammable active substances, including esters.

Properties:
- Contains special lubricating additives that exclude wear and micro-pressure of the cylinder-piston group when starting the engine;
- Protects the engine from corrosion;
- Extends the life of the engine and battery when used regularly;
- Improves the ignition of fuel;
- Has an increased calorific value and provides uniform and complete combustion of the fuel-air mixture;
- Economically.

Application:
Shake the balloon. Spray the product directly into the air filter or intake duct for 5-7 seconds, and then start the engine immediately. For petrol engines, press the gas pedal slightly. For diesel engines, press the gas pedal against failure. Do not spray on the spark plugs and parts of the heating system.

Note:
Since the product contains flammable substances, it is not allowed to smoke when using it, and it can not be used near an open fire or other sources of ignition.
