

O.E.M. for Honda Acura 7721

Innovative energy-saving premium bi-synthetic engine oil (PAO + esters), specially developed for all types of modern gasoline engines of HONDA and ACURA vehicles, including those equipped with Honda VTEC controlled gas distribution systems.

Product properties:

- Low viscous bi-synthetic (PAO + esters) base and a highly effective additive package provide reliable cold start in the most severe conditions, thereby significantly reducing engine starting wear;
- Exceptional fuel economy due to reduced high-temperature viscosity HTHS and optimal anti-friction properties;
- Due to its excellent washing and dispersing properties and the highest thermal oxidative stability, it effectively fights against all types of deposits and keeps engine parts clean throughout the entire interval between replacements;
- The ester oil components provide excellent anti-wear properties due to the exceptional strength of the oil film, which, combined with excellent pump ability, significantly increases engine life even in "start-stop" driving modes;
- It is used in engines with extended oil change intervals (Long Life) and conventional.

Designed for gasoline engines of cars, light SUVs, vans and light trucks HONDA and ACURA or where the performance level API API SN / ILSAC GF-5 of the corresponding viscosity class is required.
