

MANNOL Ultra Gear Oil 75W-90 GL-5

8118

Universal energy-saving all-season semi-synthetic gear oil of the latest generation, meeting the latest international standards. Suitable for all types of main gears with hypoid and bevel gears, transfer cases, wheel reduction gears as well as for manual gearboxes and other transmission units where GL-5 grade oil is required. Meets the requirements of the latest global J2360 standard for gear oils.

Product properties:
- High-quality base with ideal viscosity in a wide temperature range, with the addition of the latest generation additive package provides excellent anti-friction properties, which ensures significant fuel economy;
Thanks to its unique composition provides excellent anti-wear and anti-scuffing properties, which significantly extends the life of machinery in all, even the most extreme, modes of operation in a wide range of ambient temperatures.
Possesses increased resistance of the oil film to increased pressures;
- Provides excellent low-temperature properties, which ensures easy starting, reliable lubrication at all ambient temperatures (down to -45 °C) and under all operating conditions;
- Possesses unique thermo-oxidative stability and excellent resistance to high-temperature thermal degradation, which allows to extend the oil change interval and reduce maintenance costs. Retains its properties during long-term storage;
- Effectively protects against sludge and abrasive deposits that destroy oil seals;
- By using the latest generation of corrosion inhibitors, effectively protects metal parts against all types of corrosion;
- Provides excellent compatibility with seal materials, preventing swelling, hardening and shrinkage, thus reducing spare parts costs and preventing leaks;
- Reduces noise.

Recommended for use both in highly loaded transmission units of on-road (long-haul tractors, buses, etc.), off-road (construction, mining, agricultural) and special-purpose machinery, as well as in transmissions of passenger cars and light trucks.
Observe the manufacturer’s instructions in the operating manual.

PACKAGING

5L	MN8118-5	Plastic	
1000L	MN8118-IBC	Pallet tank	
208L	MN8118-DR	Drum	
60L	MN8118-60	Drum	
20L	MN8118-20	Plastic	
1L	MN8118-1	Plastic	20 pcs/box
