

MANNOL MT-16P 7412

A seasonal mineral oil that is formulated with high-quality additives. It is designed for medium-duty automotive and tractor engines without turbocharging, as well as for diesel generators and pump units.

MANNOL MT-16P oil is used for lubricating transportation diesel engines of the B2 type and other naturally aspirated engines with a similar performance level. It features excellent detergent, anti-oxidation, anti-corrosion, and anti-wear properties.

Features/Benefits:

High-Quality Additives: Ensures reliable performance under varying operating conditions.

Versatile Application: Suitable for medium-duty engines, diesel generators, and pump units.

Excellent Detergent Properties: Keeps engine components clean by preventing deposits.

Anti-Oxidation Stability: Prolongs oil life and maintains performance over time.

Anti-Corrosion Protection: Shields critical engine parts from rust and corrosion.

Anti-Wear Performance: Reduces friction and wear, extending engine life.

Broad Compatibility: Ideal for a wide range of naturally aspirated engines.
