

MANNOL Molibden Ultra Green

9092

Powered by organic green molybdenum, fully soluble in engine oil. Forms a stable, ultra-low-friction protective layer that gently shields engine parts without abrasives, enhancing durability and driving smoothness.

- Fully oil-soluble organic Mo technology.
- Not abrasive — safe for precision surfaces.
- Reduces friction and wear.
- Strengthens the oil film — may help reduce oil consumption.
- Enhances neutralising capacity and supports higher TBN retention.
- Helps maintain stable oil pressure in the lubrication system.
- Quieter, smoother engine operation.
- Safe for turbo engines, catalysts and DPF.
- Compatible with all mineral, semi-synthetic and synthetic oils.
