

MANNOL Viscosity Modifier

9942

Universal pressure stabiliser for the lubrication system, based on synthetic esters.
Quickly and reliably restores oil pressure.
Has a complex effect:
- Restores oil viscosity.
- Reduces operating consumption.
- Eliminates small leaks in the lubrication system.
- Acts as a friction modifier.

Increases the viscosity index of the oil, amplifying the thickness and strength of the oil film. Reduces friction and wear, prolongs engine life, and saves fuel. Contains fluorescent dye for leak detection. Compatible with any diesel or petrol four-stroke engine and all types of oils.
Application: Mix in a ratio of 100 ml per 1 L of engine oil.
Recommended for regular use.
