

MN8034-04 Mannol Extreme Pressure Multipurpose Grease EP2 Ester (400g)

803404

Premium-class, anti-seize, anti-friction, multipurpose lithium-calcium grease with an extended service life, formulated from a blend of highly refined base oils with the addition of synthetic esters as well as anti-wear, anti-oxidant and anti-corrosion additives.
Designed for the lubrication of wheel bearings, universal joints, chassis and other components of vehicles, agricultural and off-road machinery operating under medium to high loads. The product provides excellent corrosion protection and outstanding anti-friction, anti-seize and anti-wear properties. Recommended for use both in centralised lubrication systems and for direct grease filling. Operating temperature range: from -30°C to +120°C.
ADVANTAGES
- The presence of synthetic esters significantly improves the grease's anti-oxidant and low-temperature properties;
- Excellent performance over a wide temperature range from -30°C to +120°C;
- Ensures a long service life thanks to excellent resistance to thermal oxidation;
- Resistant to corrosion and the damaging effects of water due to the special properties of the thickener;
- The versatility of the grease allows it to be used in various friction units, significantly reducing the number of different lubricants required for use and storage.
